Soothing Heating Pad

Feel the warmth flow which mimics breathing

Cells, are the basic building blocks of life. Wellcare's Cell Heating Pad mimics the shape of the cell to symbolize that everyone needs to slow down, take deep breaths, and take care of oneself.

360° circular holes on the heating pad integrate the cold and warm air with the moisture in the air and form hundreds of strands of warmth to warm up your abdomen, shoulder, neck, back and other parts where the warmth is needed. With a perfect combination of cosy fleece for heat radiation and baby fleece on the other side for retaining warmth, this heating pad provides you with the greatest relaxation and comfort.

Turning the heating pad on, not only it provides dynamic warmth also brings a sense of joy and fulfillment. When you are surrounded by warmth, you are relaxed and the cells in your body would be well rested and cared for.
